

Title of the presentation

Event, date, country.

Anna Bianchi¹, Mario Rossi¹, Luca Verdi² & Giulia Neri¹

¹Secret Lab of Experimental Stuff
University of Somewhere

²Department of Stripy Confectioners
College of Somewhere Else

April 21, 2022

Presenting author: Mario Rossi (mario.rossi@poliba.it)

Small caps

Potential Problems

Be aware, that not every font supports small caps. If for example you typeset your presentation with pdfTeX and the Computer Modern Sans Serif font, every text in smallcaps will be typeset with the Computer Modern Serif font instead.

Potential Problems

Be aware, that not every font supports small caps. If for example you typeset your presentation with pdfTeX and the Computer Modern Sans Serif font, every text in smallcaps will be typeset with the Computer Modern Serif font instead.

Elements

Typography

The theme provides sensible defaults to
`\emph{emphasize} text`, `\alert{accent} parts`
or show `\textbf{bold} results`.

becomes

The theme provides sensible defaults to *emphasize* text, **accent** parts or
show **bold** results.

Font feature test

- Regular
- *Italic*
- SMALLCAPS
- **Bold**
- ***Bold Italic***
- **SmallCaps**
- Monospace
- *Monospace Italic*
- Monospace Bold
- *Monospace Bold Italic*

Lists

Items

- Milk
- Eggs
- Potatos

Enumerations

1. First,
2. Second and
3. Last.

Tables

Largest cities in the world (source: Wikipedia)

City	Population
Mexico City	20,116,842
Shanghai	19,210,000
Peking	15,796,450
Istanbul	14,160,467

Figures

Images go in 02-figures and are included as usual with `\includegraphics`.

Example figure.

Code

Source code lives in 03-code, in a subfolder per language (Matlab or Python).

Matlab (mcode style):

```
1 % Solving M2N for solving the ...  
    parametric_slant_hadamard_transform ...  
    matrix%  
2 function M=M2N(n) %n represents ...  
    the power of 2  
3 if n==1  
4 M=eye(2);  
5 else  
6     B=[1,1,1,1,1,1]; %input the ...  
        values of ...  
        parameters.Here in ...  
        this example n=6  
7 p=2^(n-1)-2; m=2^(2*n-2);  
8 for i=1:n
```

Python (pythonstyle):

```
1 # Esempio: risoluzione numerica ...  
    di un problema di ...  
    ottimizzazione  
2 # vincolata con il metodo del ...  
    gradiente proiettato.  
3  
4 import numpy as np  
5  
6  
7 def projected_gradient(grad, ...  
    project, x0, step=0.01, ...  
    tol=1e-6, max_iter=1000):  
8     """Minimizza una funzione ...  
        tramite gradiente ...  
        proiettato.
```

Politecnico
di Bari

Blocks

Three different block environments are pre-defined and may be styled with an optional background color.

Default

Block content.

Alert

Block content.

Example

Block content.

$$e = \lim_{n \rightarrow \infty} \left(1 + \frac{1}{n}\right)^n$$

References

Some references to showcase [2, 1]

Conclusion

Questions?

Backup slides

Sometimes, it is useful to add slides at the end of your presentation to refer to during audience questions.

The best way to do this is to include the `appendixnumberbeamer` package in your preamble and call `\appendix` before your backup slides.
